

QUICKSTOP FIRE SPRINKLER TOOL

AVOID EXPENSIVE WATER DAMAGE WITH QUICKSTOP TOOLS

Simple enough to be used by on site construction crews, security, or maintenance personnel.

The Quickstop Talon is the only sprinkler tool on the market that stops 1/2" and 3/4" sprinkler heads whether they are intact, damaged or completely sheared. Each Talon tool is designed to release when heated. This feature allows the tool to function as a temporary sprinkler head if a second fire were to start. The Talon is engineered to align itself to the sprinkler head making it the easiest sprinkler tool to use. It has a heavy duty, single hand operated design and is completely reusable. The Quickstop Talon has been tested to hold 100% water tight up to 350 PSI or 2400 KPA.

LESS WATER DAMAGE | SAFER BUILDING OPERATIONS

- ✓ **Tested up to 350 PSI**
- ✓ **No fire training needed to operate**
- ✓ **Reusable**
- ✓ **Works on recessed heads**
- ✓ **Stops 1/2" and 3/4" upright, pendant and sidewall fire sprinklers whether they are intact, damage or sheared**
